Year 2008 Report of the Research Group on Neuroimaging

Dear Dr. Rosenberg:

Since our last annual report, the Research Group on Neuroimaging has organized a Neuroimaging Symposium and a Meet the Professor activity for the 2009 World Congress, according to the following schedules:

Monday, 26 October 2009 - Neuroimaging 1 (Scientific Program - 90 minutes)

<i>Chair</i>	<i>Massimo Filippi</i>	<i>Italy</i>
Imaging of Dementia	Joseph C. Masdeu	Spain
Neuroimaging of Infection	Oscar Del Brutto	Ecuador
Movement Disorders: PET	David Brooks	UK

Monday, 26 October 2009 - Neuroimaging 2 (Scientific Program - 90 minutes)

<i>Chair</i>	<i>Joseph C. Masdeu</i>	<i>Spain</i>
New Imaging Techniques in MS	Massimo Filippi	Italy
MRI of stroke: Acute CT, DWI, PWI, SPECT, endovascular procedures	Steven Warach	USA
The effects of genes on the brain in health and diseases: An imaging approach	Giovanni Frisoni	Italy

Tuesday, 27 October 2009 - Meet the Professor (Education Program - 60 minutes)

Neuroimaging of Stroke	Steven Warach	USA
Neuroimaging of Dementia	Joseph C. Masdeu	Spain

Neuroimaging on NeuroTherapeutics: WFN Website

This page of the WFN Website, written and maintained by the Research Group on Neuroimaging, is one of the most visited in the WFN Website. It was originally written in HTML, with multiple pages and layers, and extensively illustrated with images of a number of important neurological disorders. This web site is listed in the WFN Highlights, available at <http://www.wfneurology.org/>

Combined Meeting with the American Society of Neuroimaging

It was held from January 17-20, 2008 in Tucson, Arizona. The meeting was attended mostly by neurologists interested in neuroimaging, from the US and a number of countries in Europe, South America and East Asia. In this meeting, the most recent developments in MRI, PET and SPECT were reviewed and there were scientific sessions on original research.

Neuroimaging Portal

Published neuroimages are difficult to find by pattern. To address this problem, publishers are being asked to allow posting of the images published in their journals to a website.

Participation in Other International Meetings

In addition to the meeting of the ASN, members of the Research Group participated in and contributed to the following international neuroimaging meetings:

- 10th meeting of the Organization for Human Brain Mapping, June 15 - 19, 2008, in Melbourne, Australia

Financial Statement. Dr. Kurt Jellinger continues to be the Treasurer of the Research Group. As indicated in the previous report, there were no funds in the treasury for 2000. No funds have accrued, neither expenses paid since his report. The functions of the Research Group continue to be performed by physicians contributing their time in a voluntary basis.

Respectfully submitted,

Joseph C. Masdeu, M.D., Ph.D.
Senior Staff Physician and Scientist
Section on Integrative Neuroimaging
Intramural Program, NIH (CBDB-NIMH)
