

PARANEOPLASTIC NEUROLOGICAL SYNDROMES AFFECTING THE CNS

*Clinical Phenotypes and
Treatment Options*

Dr Amy May Lin Quek

Senior Consultant, National University Hospital, Singapore

Assistant Professor, Yong Loo Lin School of Medicine,
National University of Singapore

Disclosure Slide

- Dr Amy Quek has received honoraria, educational grants and travel support from Roche, Astra Zeneca, Eisai and Merck for advisory, consulting services and speakers' fees.

Learning Objectives

By the end of the session, participants will be able to:

1. Identify and describe key clinical phenotypes of paraneoplastic syndromes of the central nervous system, and their common tumour and antibody associations.
2. Outline a diagnostic framework for a suspected paraneoplastic syndrome.
3. Formulate treatment approaches to paraneoplastic syndromes affecting the central nervous system.

Key Message

Paraneoplastic neurological syndromes of the central nervous system require early recognition of high-risk clinical phenotypes, application of structured diagnostic criteria, and timely coordination of cancer therapy with immunotherapy to achieve optimal outcomes.
