

Teaching course: Monoclonal Gammopathies and neuropathy

Speaker: Professor Mary M Reilly

Overview:

The association of monoclonal gammopathy and neuropathy can be seen in the context of monoclonal gammopathy of unknown significance but also can be seen with Anti Mag paraproteinaemic neuropathy, POEMS syndrome and AL Amyloid.

Learning Objectives:

1. Understand the association between gammopathy and neuropathy
2. Learn when further tests of the neuropathy and paraprotein are needed
3. Learn how to diagnose and basic treatment for anti MAG neuropathy
4. Learn how to diagnose and basic treatment for POEMS syndrome
5. Learn how to diagnose and basic treatment for AL amyloid
